High-Strength Grade 8 Steel Washers—USS and SAE (Type A)

Suited for use in Grade 5 and Grade 8 fastening applications, these washers are made from C1035-C1050 steel. They have dimensions that meet ASME B18.22.1.

Zinc yellow-chromate plated steel washers have good rust resistance.

Ultra-coated steel washers are treated with a silver water-based inorganic coating that provides better corrosion resistance (Type 3).
