18-8 Stainless Steel Type A SAE Flat Washer

1/4" Screw Size, 5/8" OD, .05"-.08" Thick

In stock
\$4.78 per pack of 50
96659A106

SAE Standard

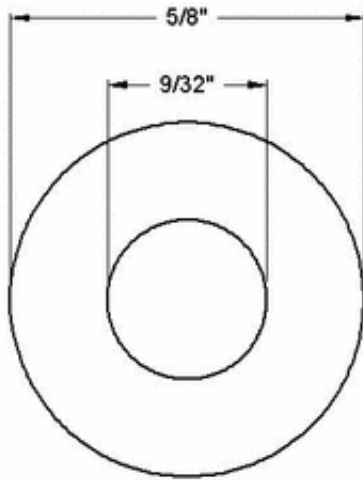

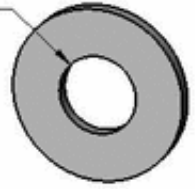

USS and SAE (Type A) are the most widely used types of washers. SAE standard washers generally have a smaller ID and OD than USS standard washers. Commonly used with bolts, screws, and nuts, all (except washers made from Type 316 stainless steel) meet ASME B18.22.1. 18-8 stainless steel washers have a minimum Rockwell hardness of B75; all others are not rated for hardness.

Type 316 stainless steel and 18-8 stainless steel washers have excellent corrosion resistance and may be mildly magnetic.

Package quantities for zinc-plated and plain steel washers are approximate, except for packages of 100.

Screw Size	1/4"
ID	9/32"
OD	5/8"
Thickness, Minimum -Maximum	0.05"-0.08"
Additional Specifications	SAE Standard
	18-8 Stainless Steel

For 1/4"
Screw Size

Washer thickness may vary from
0.05" to 0.08" in thickness.
