

Socket Head Cap Screws

For information about hex sizes and head dimensions, see [page 3079](#).

CAD Technical drawings and 3-D models available for products with this symbol.

Stainless Steel

Fully Threaded

Partially Threaded

Our stainless steel socket head cap screws have a Class 3A thread fit, a minimum Rockwell hardness of B70, and minimum tensile strength of 70,000 psi. Screw length is measured from under the head.

Type 316 stainless steel provides better corrosion resistance than 18-8 stainless steel and contains molybdenum, which increases corrosion resistance to chlorides and sulfates. May be mildly magnetic.

18-8 stainless steel offers excellent corrosion resistance and may be mildly magnetic.
